Views of COVID-19 in Wyoming – 4/13/20

A snapshot survey of Wyoming residents

April 13th, 2020

This WyoSpeaks survey of Wyoming citizens was conducted over the course of 24 hours beginning on April 13th at 7:00 AM. The survey was designed to gauge public opinion on a number of topics related to COVID-19 (Coronavirus) and approval ratings for how the president, congress, our governor, and local officials are handling the crisis. This is the second iteration of our COVID-19 tracking survey, which will be fielded at regular intervals to collect information about the changing views of Wyoming residents over time.

Methodology

This brief presents the results of the second of multiple surveys planned in 2020 to measure public opinion on a number of topics related to COVID-19 (Coronavirus) and approval ratings for how government officials are handling the related crisis.

The survey was conducted among a randomly selected sample of Wyoming residents who are members of the Wyoming Survey & Analysis Center's (WYSAC) WyoSpeaks panel of Wyoming citizens.

The survey was conducted online for 24 hours, with the first email invitations sent to selected respondents at 7:00 AM on April 13th, 2020. A total of 1,406 WyoSpeaks panel members were drawn into the survey sample, and 494 completed the

www.uwyo.edu/wysac

survey. When factoring in bad email addresses and quota screen outs, we are left with a response rate of 45%.

The survey instrument contains questions developed internally, as well as questions developed from the Great Lakes Poll, fielded by Baldwin Wallace University.

The survey implemented a quota for age, with the quota sizes based on data from the 2013-2017 American Community Survey 5-year estimates. The quota approach was used to maximize the representativeness of the initial survey responses so that less data weighting was required after data collection closed.

The survey results are weighted by gender, age, and respondent county. The overall margin of error for questions asked of all respondents is ± 4.4 percentage points. Total column percentages may not add to 100% due to rounding error. This project was funded internally by WYSAC.

About WyoSpeaks

The mission of WyoSpeaks is to give voice to Wyoming citizens on important issues facing our state and make public policy more responsive to the opinions of our citizens.

WYSAC's WyoSpeaks survey panel uses probability-based sampling methods to monitor the perspectives of Wyoming citizens through online surveys. WyoSpeaks surveys allow researchers to draw statistically valid inferences about the state as a whole. Over the course of a year, the Wyoming Survey & Analysis Center conducts a number of state-wide telephone surveys where all Wyoming residents have an equal probability of selection. During these surveys, respondents are given the opportunity to join the WyoSpeaks panel of Wyoming citizens. The only way to be added to the WyoSpeaks panel is through this random selection process. WyoSpeaks offers researchers, agencies, and organizations a cost-effective alternative to focus groups and robust telephone and mail surveys with a quick turnaround of statistically valid and reliable results.

For more information about pricing and getting your questions answered by the WyoSpeaks panel members, please email us at wysac.src@uwoyo.edu.

Key Findings

This survey, conducted Monday April 13th, is the second of multiple surveys WYSAC plans to field to measure public opinion on a number of topics related to COVID-19. A total of 494 Wyoming residents participated in the survey representing all Wyoming counties, with a margin of error of plus or minus 4.4 percentage points.

Complete survey results, as well a visual display of select results, can be found in the survey results section. Here are some of this survey’s key findings and comparisons with the results from two weeks ago:

- 39.5 percent of residents say they or anyone in their immediate family had been laid off or lost their jobs, an increase of 7.7 percentage points in the last two weeks.
- 61.1 percent say they or anyone in their immediate family has had their work hours or pay cut, an increase of 4.8 percentage points in the last two weeks.
- 74.3 percent say they are very concerned about the impact of COVID-19 on the economy, and increase of 2.9 percentage points.
- 30.6 percent say they were concerned about the impact of COVID-19 on their personal finances, a decrease of 4.9 percentage points.
- 10.6 percent say they have not changed their daily routines specifically because of COVID-19, holding steady from 10.2 percent two weeks ago. 35.2 percent have changed their daily routine a little, while 54.2 percent said they have changed it a lot.
 - 51.8 percent of residents say they are now declining visits from friends and family, an increase of 4.4 percentage points.
 - 71.5 percent of residents say they are eating out less, which represents a decrease of 4.0 percentage points from two weeks ago.
 - Nearly half (45.5 percent) of residents say they now wear personal protective equipment (PPE) like masks, gloves, etc., when in public places.
 - Over 77 percent say they are avoiding physical contact with others, spending more time at home, and not attending public gatherings - representing the top three changes residents have made to their behaviors in response to COVID-19.
- 24.1 percent say that the worst is behind us in the United States, an increase of 16.9 percentage points. 44.1 percent say that the worst is yet to come, a decrease from 66.6 percent from two weeks ago.

Regarding policies enacted to slow the spread of the virus, support remains high for the closure of K-12 schools with 84.4 percent support (-.9 percentage points), closure of daycare centers with 78.2 percent support (-2.7 percentage points), and in limiting public gatherings with 82.2 percent support (-6.3 percentage points). Support for a “shelter-in-place” order decreased from 54.4 percent two weeks ago to 47.8 percent (-6.6 percentage points).

If a vaccine becomes available, 76.4 percent say they will likely get the vaccine – a decrease of 3.8 percentage points from 2 weeks ago. Alternatively, 14.6 percent say they are very unlikely to get the vaccine – an increase of 4.3 percentage points.

The survey also asked for perspectives on the way local, state and national leaders are handling the virus response. Results from those questions include:

- 62.0 percent approve and 35.8 disapprove of the way President Donald Trump is handling COVID-19 – representing a net approval +26.1 points, a decrease of 1.9 points from two weeks ago. 57.6 percent say they trust what they hear about the virus from him, an increase of 1.9 percentage points.
- 76.1 percent approve and 20.8 disapprove of the way Gov. Mark Gordon is handling COVID-19 – representing a net approval rating of +55.3 points, a decrease of 12.6 points from two weeks ago. 84.1 percent say they trust what they hear about the virus from him, a decrease of 2.7 percentage points.
- 41.9 percent approve and 49.5 percent disapprove of the way congress is handling COVID-19 - representing a net approval rating of -7.6 points, a decrease of 2.2 points from two weeks ago.
- 77.4 percent approve and 18.6 percent disapprove of the way their local government and health officials are handling COVID-19, - representing a net approval rating of +58.8, a decrease of 3.7 percentage points from two weeks ago. 83.2 percent say they trust what they hear about the virus from them, a decrease of 2.6 percentage points.

This survey also asked how much residents trust the information they hear about COVID-10 from the national news media, with 41.5 percent saying they trust what they hear a great deal or a good amount. 58.5 percent say they trust what they hear not very much or not at all.

When asked about how much they trust what they hear about COVID-19 from their local news media, 66.6 percent said they trust what they hear a great deal or a good amount, while 33.4 percent say they trust what they hear not very much or not at all.

Finally, asked if they think COVID-19 is a real threat or blown out of proportion, 61.0 percent say it is a real threat (2.1 percentage points decrease), 28.8 percent say its blown out of proportion (4.6 percentage points increase), and 10.2 percent are unsure (1.8 percentage points decrease).
