Views of COVID-19 in Wyoming – 5/11/20

A snapshot survey of Wyoming residents

May 11th, 2020

This WyoSpeaks survey of Wyoming citizens was conducted over the course of 24 hours beginning on May 11 at 7:00 AM. The survey is designed to gauge public opinion on a number of topics related to COVID-19 (Coronavirus) and approval ratings for how the president, congress, our governor, and local officials are handling the crisis. This is the fourth iteration of our COVID-19 tracking survey, which will be fielded at regular intervals to collect information about the changing views of Wyoming residents over time.

Methodology

This brief presents the results of the fourth of multiple surveys planned in 2020 to measure public opinion on a number of topics related to COVID-19 (Coronavirus) and approval ratings for how government officials are handling the related crisis.

The survey was conducted among a randomly selected sample of Wyoming residents who are members of the Wyoming Survey & Analysis Center's (WYSAC) WyoSpeaks panel of Wyoming citizens.

The survey was conducted online for 24 hours, with the first email invitations sent to selected respondents at 7:00 AM on May 11th, 2020. A total of 1486 WyoSpeaks panel members were drawn into the survey sample, and 473 completed the

survey. When factoring in bad email addresses and quota screen outs, we are left with a response rate of 39.5%.

The survey instrument contains questions developed internally, as well as questions developed from the Great Lakes Poll, fielded by Baldwin Wallace University.

The survey implemented a quota for age, with the quota sizes based on data from the 2013-2017 American Community Survey 5-year estimates. The quota approach was used to maximize the representativeness of the initial survey responses so that less data weighting was required after data collection closed.

The survey results are weighted by gender, age, and respondent county. The overall margin of error for questions asked of all respondents is ± 4.5 percentage points. Total column percentages may not add to 100% due to rounding error. This project is funded internally by WYSAC.

About WyoSpeaks

The mission of WyoSpeaks is to give voice to Wyoming citizens on important issues facing our state and make public policy more responsive to the opinions of our citizens.

WYSAC's WyoSpeaks survey panel uses probability-based sampling methods to monitor the perspectives of Wyoming citizens through online surveys. WyoSpeaks surveys allow researchers to draw statistically valid inferences about the state as a whole. Over the course of a year, the Wyoming Survey & Analysis Center conducts a number of state-wide telephone surveys where all Wyoming residents have an equal probability of selection. During these surveys, respondents are given the opportunity to join the WyoSpeaks panel of Wyoming citizens. The only way to be added to the WyoSpeaks panel is through this random selection process. WyoSpeaks offers researchers, agencies, and organizations a cost-effective alternative to focus groups and robust telephone and mail surveys with a quick turnaround of statistically valid and reliable results.

For more information about pricing and getting your questions answered by the WyoSpeaks panel members, please email us at wysac.src@uwoyo.edu.

Key Findings

This survey, conducted Monday May 11th, is the fourth of multiple surveys WYSAC plans to field to measure public opinion on a number of topics related to COVID-19. A total of 473 Wyoming residents participated in the survey representing all Wyoming counties, with a margin of error of plus or minus 4.5 percentage points.

Complete survey results, along with charts and figures, can be found in the main body of the report. Here are some of this survey's key findings:

- Approval for the way Wyoming Governor Mark Gordon is handling the COVID-19 crisis remains high, with 74 percent saying they *strongly approve* or *somewhat approve* of the way he is handling things. Governor Gordon's net approval rating (approval minus disapproval) remains high at plus 50 percentage points.
- Approval for the way President Donald Trump is handling the COVID-19 crisis decreased slightly again, with 57 percent saying they *strongly approve* or *somewhat approve* of the way he is handling things. President Trump's net approval rating decreased by 3.7 percentage points to plus 17 points.
- Approval for the way local government and health officials are handling the COVID-19 crisis is at 70 percent saying they *strongly approve* or *somewhat approve* of the way they are handling things – reflecting a 7 percentage point decrease from two weeks go. The net approval remains for this group is at plus 46 percentage points, a decrease of 13 points from two weeks ago.
- Approval for the way congress is handling the COVID-19 crisis decreased 7 percentage points, with 35 percent saying they *strongly approve* or *somewhat approve* of the way congress is handling things. The net approval rating for congress is minus 12 percentage points.

Support for major policies to help prevent the spread of COVID-19 continue to decline:

- 70 percent say they support the closure of K-12 schools, a decrease of 6 percentage points.
- 62 percent say they support the closure of daycare centers, a decrease of 5 percentage points.
- 59 percent say they support the closure of restaurants and bars, a decrease of 5 percentage points.
- 67 percent say they support the limiting of public gatherings, a decrease of 7 percentage points.
- 39 percent say they support a “shelter-in-place” order, a decrease of 5 percentage points.

Over a third (35 percent) of Wyoming residents say they are *very anxious* or *fairly anxious* about the spread of COVID-19 in Wyoming. Another 33 percent say they are *somewhat anxious*, while 32 percent say they are *not at all* anxious.

Nearly a quarter (23 percent) of Wyoming residents say that COVID-19 is *not likely to be a major problem* in Wyoming, while 22 percent say that the worst is behind us. 39 percent of residents say that the worst is yet to come.

While the proportion of Wyoming residents who say that they think COVID-19 is a *real threat* remained steady at 54 percent, but the number who say it is *blown out of proportion* increased 4 points to 40 percent while those that are *unsure* decrease 4 points to 6 percent.

The number of people in Wyoming who say they are not changing their daily routine due to COVID-19 has increased 3 percentage points from two weeks ago to 15 percent. The number of people who say they have changed their daily routine *a lot* has decreased 5 percentage points to 43 percent, while 42 percent say they have changed their routine *a little*.

- A majority of Wyoming residents (51 percent) now say they wear personal protective equipment (PPE) like masks or gloves in public spaces, representing the only increase in precautions taken by Wyoming residents to prevent the spread of COVID-19.
- Large decreases occurred for those reporting that they are *declining visits from friends and family* (39 percent, a decrease of 7 points), and for *avoiding houses of worship* (39 percent, a decrease of 7 points).
- Fewer people report that they are *not attending public gatherings* (70 percent, a decrease of 5 points), *eating out less* (67 percent, a decrease of 4 points), and *spending more time at home* (69 percent, a decrease of 4 points).

More Wyoming residents report that they are *very unlikely* to get a vaccine for COVID-19 if one becomes available, with 23 percent saying this is the case, an increase of 4 points. Additionally, 12 percent say it is *somewhat unlikely*, an increase of 4 points. Nearly half (49 percent) say they are *very likely* to get a vaccine, while 17 percent say they are *somewhat likely*.
