Views of COVID-19 in Wyoming – 8/10/20

A snapshot survey of Wyoming residents

August 10th, 2020

This WyoSpeaks survey of Wyoming citizens was conducted over the course of 24 hours beginning on August 10 at 7:00 AM. The survey is designed to gauge public opinion on a number of topics related to COVID-19 (Coronavirus) and approval ratings for how the president, congress, our governor, and local officials are handling the crisis. This is the fifth iteration of our COVID-19 tracking survey, which will be fielded at regular intervals to collect information about the changing views of Wyoming residents over time.

Methodology

This brief presents the results of the seventh of multiple surveys planned in 2020 to measure public opinion on a number of topics related to COVID-19 (Coronavirus) and approval ratings for how government officials are handling the related crisis.

The survey was conducted among a randomly selected sample of Wyoming residents who are members of the Wyoming Survey & Analysis Center's (WYSAC) WyoSpeaks panel of Wyoming citizens.

The survey was conducted online for 24 hours, with the first email invitations sent to the selected respondents at 7:00 AM on August 10th, 2020. A total of 1341 WyoSpeaks panel members were drawn into the survey sample; 503 completed

the survey. When factoring in bad email addresses and quota screen outs, we are left with a response rate of 41%.

The survey instrument contains questions developed internally, as well as questions included in the Great Lakes Poll, fielded by Baldwin Wallace University.

The survey implemented a quota for age, with the quota sizes based on data from the 2013-2017 American Community Survey 5-year estimates. The quota approach was used to maximize the representativeness of the initial survey responses so that less data weighting was required after data collection closed.

The survey results are weighted by gender, age, and respondent' county. The overall margin of error for questions asked of all respondents is ± 4.4 percentage points. Total column percentages may not add to 100% due to rounding error. This project is funded internally by WYSAC.

About WyoSpeaks

The mission of WyoSpeaks is to give voice to Wyoming citizens on important issues facing our state and make public policy more responsive to the opinions of our citizens.

WYSAC's WyoSpeaks survey panel uses probability-based sampling methods to monitor the perspectives of Wyoming citizens through online surveys. WyoSpeaks surveys allow researchers to draw statistically valid inferences about the state as a whole. Over the course of a year, the Wyoming Survey & Analysis Center conducts a number of state-wide telephone surveys where all Wyoming residents have an equal probability of selection. During these surveys, respondents are given the opportunity to join the WyoSpeaks panel of Wyoming citizens. The only way to be added to the WyoSpeaks panel is through this random selection process. WyoSpeaks offers researchers, agencies, and organizations a cost-effective alternative to focus groups and robust telephone and mail surveys with a quick turnaround of statistically valid and reliable results.

For more information about pricing and getting your questions answered by the WyoSpeaks panel members, please email us at wysac.src@uwoyo.edu.
